A product by Sustainable Landscaping

Available in
20 - 40 MPA

- ✓ Shared footpaths
- ✓ Driveways
- ✓ Feature Paving and Pool Paving
- ✓ Rendered wall Cladding

Why choose poured limestone look paving for your next project?

Poured limestone look paving is a unique paving system with a hand crafted finish, so no two projects look the same.

This paving system can be poured to any thickness and has a wide MPA rating making it an ideal choice for a range of surfaces including load taking.

Poured Limestone look paving has many benefits over traditional paving and concrete products such as;

- Expansion (Control) joints are concealed within the unique pattern
- Grouting not required, but can be done for appearance
- Non slip surface
- No weeds growing between pavers

Slip rating equivalent to a broom finish or stipple finished concrete!
